EXAMINER'S AMENDMENT

This Examiner's amendment, appearing below, supplements the Examiner's amendment mailed on April 6, 2007. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicants' Attorney, Noel Kivlin, on August 30, 2007.

The application has been amended as follows:

Please replace the Abstract with the following, new Abstract:

-- System and method for configuring a graphical user interface (GUI) element to publish data to a data target and/or subscribe to data from a data source. During program development, a developer associates a GUI element with a program, e.g., for receiving user input data and/or indicating data to the user. The developer configures the GUI element to publish data associated with the GUI element to a data target and/or to subscribe to data from a data source, and specifies a data source or target for the data connection. The program is executed, during which the program automatically determines and uses an appropriate protocol for interfacing with the data source/target to connect to or open the data source and/or target, and receive data from the data source, which is provided to and displayed by the GUI element, and/or send or write data associated with the GUI element to the data target.--
